

# PScoat - Industry

A range of thermal insulation coatings suitable for use in the construction and reconstruction of industrial buildings.

- Highly effective, thermal insulation and energy-saving water-thin able coating based on acrylic resin filled with microspheres.
- Ecological, environmentally friendly, non-toxic and harmless to health, which allows the application of the coating without restrictions even inside the rooms.
- Stable, fully washable, dust-free during changes in atmospheric conditions and resistant to the C4 and C5 chemical environments.

# PScoat - Industry

- It reflects up to 91 ± 1% of all solar radiation (TSR), thus reducing energy costs for cooling by up to 50%, thanks to its thermal insulation properties it also prevents heat leakage and thus reduces heating costs and subsequently pollution in urban agglomerations.
- Teplotně stabilizuje provoz zařízení a zároveň stabilizuje okolní teplotu.
- It creates a uniform membrane that seals micro cracks, protects the substrate from surface condensation, eliminates corrosion and extends the life of equipment and objects.

PSC 250T HP/HP+	PSC 250T EC/EC+ (colour)	PSC 250T ECE ELASTIC	PSC 250T EC BASIC A
-----------------	--------------------------	----------------------	---------------------

## Applicable to surfaces

Ferrous and non-ferrous metals, metal tanks, pipes, valves, industrial equipment	✓	✓		✓
New and old metal roof surfaces	✓	✓		✓
Plastic surfaces (PVC, PS, PC, etc.)			✓	

## Additional Features

Protection against biological rust	✓	✓	✓	✓
Protection against water condensation	✓	✓	✓	✓
Protection against mould	✓	✓	✓	✓
Resistance to dirt and diluted chemicals			✓	✓
Temporary waterproof partition	✓	✓	✓	✓
Vapour permeable partition				
High adhesion to all known surfaces, including concrete and metals	✓	✓		✓
High adhesion to plastics			✓	
Primer improving the thermal insulation properties of other PSC 250T coatings				✓
